

The two types of anchor tag target attributes are:

- **target="\_blank"**

`<a href="https://en.wikipedia.org/wiki/Batman" target="_blank">This will open in another tab.</a>`

[Click here](#) to execute \_blank target.

- **target="\_self"** (If no target is applied, default value used is \_self)

`<a href="https://en.wikipedia.org/wiki/Batman" target="_self">This will open in same tab.</a>`

[Click here](#) to execute \_self target.
