Other commonly used text formatting tags:

- The HTML <u> element is used to underline text.

```
<p>
        <u>Batman</u> is a fictional comic character created by artist Bob Kane and
writer Bill Finger.
              <br>
        Batman first appeared in DC comics in the year 1937 and soon became
popular
    .</p>
```

- The HTML <mark> element is used to highlight text.

```
<p>
  <u>Batman</u> is a fictional comic character created by artist Bob Kane and writer
Bill Finger. <br> Batman first appeared in DC comics in the year 1937 and soon
became popular.
</p>
```

- The HTML <tt> element is used to make text appear as if it is typed by a
  typewriter.

```
<p>
<tt>Batman</tt> is a fictional comic character created by artist Bob Kane and writer
Bill Finger.<br>Batman first appeared in DC comics in the year 1937 and soon
became popular.
</p>
```

- The HTML <del> element is used to define a deleted (removed) text.

```
<p>
<b>Batman</b> is a fictional comic character created by artist Bob Kane and writer
Bill Finger.<br>Batman first appeared in DC comics in the year 1937 <del>and soon
became popular</del>.
```

```
</p>
```
