Note from Instructor:

1. Since id attribute is used to identify elements uniquely, ideally two elements should not have the same id.
2. The commonly used block level elements are:
   1. \<div\>
   2. \<footer\>
   3. \<form\>
   4. Heading levels \<h1\> to \<h6\>
   5. \<header\>
   6. List related elements \<li\>,\<ol\>, \<ul\>
   7. \<p\>
   8. \<nav\>
   9. \<table\>
