Forms

In the previous lesson we learnt to create forms. Let us create a subscription box our superhero page. The subscription box should look like this.

Subscribe to our newsletter

The subscription box has one text input field and a submit button next to it. There is a heading to this subscription box. The subscription box and heading are at the center of the page.

Follow steps below to add subscription box to our index file. The subscription box section comes after Batman Movies section.

Add a new div after Batman Movies section. Content in this new div is centrally aligned. Add h4 heading - Subscribe to our newsletter

```
<div>

   <center>

            <h4> Subscribe to our newsletter </h4>

     </center>

</div>
```

Add a form within this div. Create two input - one for text input and other for submit button. Give identity as subscribe to submit input

```
<div>

   <center>

            <h4> Subscribe to our newsletter </h4>

                   <input type="text">

                   <input type="submit" value="Subscribe" id="subscribe">

      </center>

 </div>
```

Now style these inputs by adding style statement in the stylesheet. We will style submit input by adding id selector. For text input, we will style it using input selector. We will properties such as padding, font-size, margin etc for both the fields.

```
input {

    padding: 14px 70px;

    font-size: 15px;

    margin-bottom: 30px;
```

```
}
#subscribe {
    border: none;
    background-color: #26211f;
    color: white;
    font-size: 16px;
    margin: 4px -4px;
    padding: 16px 40px;
}
```

We have added subscription box to our superhero page.
