There is another list called definition list . Like the name indicates a Definition lists is used for creating a list and defining the terms in the list example a glossary.

Batmobile

Batman's primary vehicle is the Batmobile, which is usually depicted as an imposing black car, often with tailfins that suggest a bat's wings.

Bat-Signal

A searchlight with a bat-shaped insignia over the lens which shines into the night sky, creating a bat-symbol

```
<dl>

<dt><b>Batmobile</b></dt>

<dd>Batman's primary vehicle is the Batmobile, which is usually depicted as an imposing black car, often with tailfins that suggest a bat's wings. </dd><br/>

<dt><b>Bat-Signal</b></dt>

<dd>A searchlight with a bat-shaped insignia over the lens which shines into the night sky, creating a bat-symbol </dd>

</dl>
```

Styling Lists

We can change the list style of ordered or unordered list using the type attribute

Ordered list type attributes:

- type= "a"sets lowercase letters
- type= "A" sets uppercase letters,
- type= "i" sets lowercase Roman numerals,
- type= "I" sets uppercase Roman numerals,
- type= "1" sets numbers (default).

Unordered list type attributes:

- type= "circle" sets circular bullets

- type= "disc" sets disc type bullets
- type= "square." sets square bullets
- type="none" sets no bullets
